## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

This application is in condition for allowance except for the presence of claims 28-37 directed to a refrigerant expansion valve non-elected without traverse.

Accordingly, claims 28-37 have been cancelled.

After speaking with Attorney Carl Schaukowitch applicants have decided to cancel claims 28-37, and keep allowable subject matter claims 1-4,6,9-11, and 14-27.

### **EXAMINER'S REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Claims 1-4, 6, 9-11, and 14-27 are allowed.

The prior art does not anticipate nor render obvious the combination set forth in the independent claims, and specifically does not show an expansion valve with a spherical valve plug, a support ring formed of upper and lower circular annular portions and vibration-proof plate springs cut out of the annular portions with each vibration-proof spring is formed having a portion to be in pointed contact with the operating rod. Yano et al. US 6702188 teach an expansion valve with a spherical valve plug and vibration proof springs however do not teach each vibration proof spring having a portion in pointed contact with the operating rod. This modification would not have been known by one of ordinary skill in the art at the time the invention was made without impermissible hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
